Additional Terms and conditions to SBD for Post 5 year maintenance through E-marg

1. Scope of Bid

Bids are invited by the West Bengal State Rural Development Authority (WBSRDA) from established, experienced and reputed firms registered in appropriate class for repair & maintenance of Roads included in individual package (As per NIT).

The main elements of the Works and Services to be provided by the Contract are listed below:

- a. **Initial Rehabilitation** - Works as indicated in the BOQ, Contract and as instructed by the EE
- b. **Routine Maintenance** – to be carried out as indicated in the contract and as instructed by the EE.
- c. **Periodical Renewals** – to be carried out as indicated in the contract and/ or as instructed by the EE.
- d. **Emergency Works** - As indicated in the NIT and when instructed by employer by issue of work order.

Bid may be invited for one or more work services listed from (a) to (d) above. Bidder should, therefore, go through the NIT carefully and quote for the work for which bid has been invited. Percentage quoted by the bidder will be applicable to all work/ services indicated above.

The successful Bidder will be expected to carry out the Works and Services during the period stated in the NIT and work order.

Throughout these documents, the terms — bid and —tender and their derivatives (bidder/ tenderer, bid/ tender, bidding/ tendering etc.) are synonymous.

Routine Maintenance - The contractor is responsible for undertaking all maintenance that is set out in the contract, without requiring the intervention or instruction of the Engineer, other than that the latter will undertake inspections to assess compliance with the service intervention levels, as a prerequisite to certifying payment. The contractor is, therefore, responsible for choosing the methodology, which is the most efficient and cost effective, whilst at the same time delivering the service quality levels without compromising the convenience and safety of the road user.

The rates of routine maintenance are based on the principal of monthly lump-sum payment to be made for complete services under taken in compliance with the contract. Payment will be regulated as per provisions of SBD.

The contractor shall do the maintenance of roads, pavement, road sides and cross drains, culverts/ bridges, surface drains to the required standards and keep the entire road surface and structure in defect free condition during the entire maintenance period, keeping in view provisions of Chapter 11 of Rural Road Manual (IRC: SP: 20:2002), specific provisions of which are given in the contract data.

Initial Rehabilitation Works

As provided under the contract, initial rehabilitation works, shall be carried out in accordance with the Technical Specifications at unit rates/prices offered by the contractor in his Bid for the estimated quantities shown in the Bill of Quantity, and completed within the time indicated in the work order issued by the Engineer for the execution of the initial rehabilitation works. Payment for such work shall be based on the work actually executed, measured and accepted by the engineer in terms of the agreement.

Periodic Renewal

If included in the agreement, the periodic renewal bituminous surface shall be carried out by the contractor in accordance with specifications and at the rate offered by the contractor in his Bid for the estimated quantities shown in the bill of quantities within the time period indicated in the work order.

Emergency works

If provisions exist in the agreement, emergency work will be carried out by the contractor in accordance with the specifications and at the rate offered by the contractor in his bid. Such work will be carried out when specially ordered by the employer by issue of a supplementary work order and within the time limit indicated their in.

The Contractor shall undertake these tasks using intermediate Technology, i.e. by both manual and mechanized means as appropriate, in order to achieve both the quantity and quality of work required under the Contract. Consequently, the contractor shall deploy and keep available on site the minimum numbers of Plant and Equipment listed in the Contract Data.

The Contractor must also deploy sufficient and adequate plant, equipment and mobile unit required for maintenance work and to achieve the completion of rehabilitation and renewal work, described above, within the time. The Contractor should note that any Failure to complete the works within the given time limit will attract the provisions of SBD and other clauses of the contract. Failure to comply with this requirement may be considered a Fundamental Breach.

2. Commencement and Duration of the Works and Services

Contract period is five years from start date unless otherwise indicated in the NIT. The contractor shall commence execution of routine maintenance on the start date and shall continue such execution for the full duration of the contract period and which may be extended either by grant of extension as per SBD or specifically as a result of a variation order as per SBD.

Where Initial Rehabilitation is to be undertaken, it shall commence from the start date and be

completed within the time limit specified in the contract.

Whenever periodic renewal works are included in the contract or instructed by the employer, the construction time table shall be set outside of the months of the monsoon season, and the intended works completion date shall be confirmed in the instruction, in accordance with the provisions of SBD. No works shall be instructed for which the construction period would extend beyond the end of the Contract Period.

Similarly when instructions are issued by the Executive Engineer for carrying out any emergency work, start date will commence from the date of work order and intended completion date shall be as mentioned in the work order.

The contract completion date shall occur at the conclusion of the Contract Period, but shall be deferred by any period for which defects pointed out by the engineer during contract period remain to be rectified. Any changes or extensions to this date will be confirmed from time to time, as necessary, by the Engineer. If contractor is not attending rectification of defects pointed out by the engineer within the time limit given in the notice or extension granted on the request of contractor action as per SBD will be taken.

3. Approval of Contractor's Designs and Proposals

The contractor shall be responsible for the design of all temporary works necessary for the execution of the works and maintenance including, inter alia, support of excavations support of tall and overhead structural elements during erection, provision of formwork for placing concrete, and for traffic management arrangements the Contractor shall submit full drawings and specifications of the proposed temporary works, to the Engineer, for his approval

The Engineer's approval shall not alter the Contractor's responsibility for ensuring that the Temporary Works are safe, complete, and fit for purpose.

The Contractor shall obtain approval of third parties to the design of the temporary works, where required.

If the Contractor has failed to cooperate in dealing with a delay, the delay by this failure shall not be considered in assessing any extension.

The employer may, while the work is in progress, grant interim extension of time on the request of contractor, reserving the right to recover the liquidated damages and decide the quantum of liquidated damages as set out in SBD on completion of work taking into account the effect of compensation events and delay on the part of contractor.

4. Delays Ordered by the Engineer

The Employer may instruct the Contractor to delay the start or progress of any activity within the works.

5. Work and Inspection

The Contractor is solely responsible for ensuring that construction work {Initial Rehabilitation, Periodic Renewal emergency works) are carried out in accordance with the quality requirements of the contract documents. However, whenever the contractor anticipates covering up any work, he must notify the engineer in advance so that the Engineer has an opportunity to inspect and / or test the works to be covered.

In any case, the Contractor shall submit timely requests to the Engineer to give his approval of works which have been completed and which have successfully passed the specified tests, and for which certification for payment will be requested in the next Monthly Statement.. Otherwise, the Engineer may choose not to certify the works for payment

However, from time to time, the Engineer shall independently check the contractor's work and notify the contractor of any faults that are found, so that the contractor may correct them before covering up or proceeding further. Such checking shall not affect the contractor's responsibilities. The engineer may instruct the contractor to uncover and test any work that the engineer considers may be faulty and which has been covered without due notice.

Routine Maintenance Work - The Contractor shall do the routine maintenance of roads, including pavement, road sides and cross drains including surface drains, culverts/ bridges to the required standards and keep the entire road surface and structures in defect free condition during the entire contract period. Various routine maintenance activities and their periodicity given in the contract data will be followed.

The routine maintenance standards shall meet the following minimum requirements:-

- a. Potholes on the road surface to be repaired soon after these appear or brought to his notice either during contractor's monthly inspection or by the Engineer, maximum within 7 days.
- b. Road shoulders to be maintained in proper condition to make them free from excessive edge drop offs, roughness, scouring or potholes.
- c. Cleaning of surface drains including reshaping to maintain free flow of water.
- d. Cleaning of culverts and pits for free flow of water.
- e. Any other maintenance operation required to keep the road traffic worthy at all time during the maintenance period.

6. Monitoring & Inspection of Routine Maintenance Works

To fulfil the objectives of Routine Maintenance the contractor shall undertake detailed inspection of the roads at least once in a month, and shall maintain a record of his inspection. The contractor shall forward to the engineer the record of inspection, together with details of the routine maintenance which has been carried out during that month. The engineer shall formally verify that, from his own inspections, if the condition of the roads is satisfactory he shall endorse the contractor's record of inspection by signature. The contractor shall pay particular attention on those road sections which are likely to be damaged or inundated during the rainy season.

The Engineer may also monitor the condition of the roads on a "regular basis and shall draw the Contractor's attention to any aspect of maintenance which has been overlooked.

7. Extension of Routine Maintenance Period

If circumstances require the employer may reach agreement with the contractor to extend the period of routine maintenance beyond the period provided, up to the limit specified in the contract data, and such an agreement shall be formalized in writing and shall constitute a variation to the contract.

Payment during extended period shall be made at the rate applicable during the year proceeding the extended period.

8. Certification of Payments

Submission of Monthly Statement - At the end of each month subsequent to the start date, the contractor shall submit to the engineer a statement of the total value of the work and services that he has executed to date and which have been approved by the engineer in accordance with SBD and the scope of works, less the cumulative amount certified previously.

This monthly statement shall include the valuation of instructions, variation orders and compensation events. All such monthly payments will be by way of advance payments to be adjusted in the final Bill.

a) Routine Maintenance Works - for routine maintenance works, the contractor's statement shall be supported by a copy of the Contractor's Record of inspection for the month, which shall have been endorsed by the engineer as per SBD.

To consider the certification of payment for routine maintenance, the engineer shall determine whether the contractor has actually achieved compliance with the Service Quality Levels (or other requirements) specified in the Scope of Works and with reference to 100 point (hundred point) performance indexes assigned to various maintenance activities as specified in contract, and the engineer shall certify the amount to be paid to the contractor.

The payment for maintenance will be made once in 2 months @ 1/6 of the approved rate for the year subject to the above conditions. Before releasing payment for a particular road EE will see, with reference to 100 point (hundred point) performance index that contractor has attended required maintenance during that period on that road. If contractor has not attended maintenance work to the required standard **and performance index is below 80 points (eighty points) no payment will be released for that period even if such maintenance is attended in subsequent months. If performance index is between 80 to 100, proportionate deduction in payment will be made for each item/activity of the work not attended during that period. For performance evaluation and payment of routine maintenance individual road shall be the unit. No payment shall be made for part maintenance of a road.**

b) Construction Works - for the various construction works undertaken by the contractor the statement shall be supported by detailed measurement of all items of work executed during the preceding month and which have not already been certified for payment (together with any qualifying work which has not been included in any previous statement) earlier.

The extent or volume of the work executed shall be determined from independent measurements

made by the Engineer, and the value of that work shall be calculated in accordance with the approved rates and shall be certified accordingly for payment.

Payment for Works for which no rate or price has been entered in the Bill of Quantities, will not be certified by the engineer as the cost shall be deemed to be covered by other rates or prices in the Contract (in case of item rate tender).

c) Certification - Within 14 days of receipt, the Engineer shall check the Contractor's Monthly Statement and shall certify the amount to be paid to the Contractor. The Engineer may delete or reduce the value of any item certified in a previous monthly statement, in the light of later, corrected, information.

The certification and payment of the final account shall be governed by the relevant clause of SBD

9. Liquidated Damages

For works other than routine maintenance - The Contractor shall pay liquidated damages to the Employer at the rate per week or part thereof stated in the SBD for the period that the Completion Date of the works mentioned in the agreement/NIT/Work order, is later than the Intended Completion Date. Liquidated damages at the same rate shall be withheld if the Contractor fails to achieve the milestones prescribed in the SBD. However, in case the Contractor achieves the next milestone the amount of the liquidated damages already withheld shall be restored to the Contractor by adjustment in the next payment certificate. The total amount of liquidated damages shall not exceed the amount defined in the SBD. The Employer may deduct liquidated damages from payments due to the Contractor. Payment of liquidated damages shall not affect the Contractor's other liabilities. The delay in departmental assistance ingrained in the contract will be duly taken into the account while recovering any compensation for delay. Decision of competent authority of WBSRDA in this regard shall be final.

If the Intended Completion date is extended without penalty after liquidated damages have been paid, the Engineer shall correct any overpayment of liquidated damages by the Contractor by adjusting the next payment certificate.

For Routine Maintenance – If contractor fails to attend maintenance work even after notice being served by the engineer, penalty at the rate of one thousand per Km. per week for the total length of the damaged road requiring maintenance shall be recovered. Delay beyond one month will be a cause for termination of contract.

10. Routine Maintenance during contract period and performance Index:

Maintenance operations during the period of contract shall be based on Chapter 11 of Rural Roads Manual (IRC:SP:20:2002). Its specific provisions and performance index are tabulated below :-

Routine Maintenance Activities and their frequency with performance index -

Sl. No.	Name of Item/Activity	Frequency of operations in the year	Performance Index
1	Restoration of rain cuts and dressing of berms as per clause 1902 of the Specifications.	Once generally after rains or as and when required).	10
2	Making up of shoulders as per clause 1903 of the Specifications.	As and when required	20
3	Maintenance of Bituminous surface road and / or gravel road and/or WBM road including filling pot holes and patch repairs etc. as per clause 1904, 1906 of the Specifications.	As and when required	50
4	Maintenance of drains as per clause 1907 of the Specifications.	Twice (In case of hill roads as and when required).	3
5	Maintenance of culverts and cause ways as per clause 1908 and 1909 of the Specifications.	Twice (In case of hill roads as and when required).	5
6	Maintenance of guard rails and parapet rails as per clause 1911 of the Specifications	Maintenance as and when required. Repairing once in a year.	
7	Maintenance of road signs as per clause 1910 of the Specifications.	Maintenance as and when required. Repairing once in every two years.	2
8	Maintenance of 200 m and Kilo Meter stones as per clause 1912 of the Specifications.	Maintenance as and when required. Repairing once in a year.	2
9	Cutting of branches of trees, shrubs and trimming of grass and weeds etc. as per clause 1914 of the Specifications.	Once generally after rains (In case of areas having rainfall more than 1500 mm per year, as and when required.	3
10	White washing parapets of C.D. Works	Once in a year	2
11	White washing guard stones	Twice in a year	
12	Re-fixing displaced guard stones	Once in a year	
13	Repair of old joints sealant (CC joints)	Maintenance as and when required.	3

11. Specific activities to be performed and their mode of payment:

Specific activities to be performed and their mode of payment under 5 year maintenance contract are once again stated as below;

Initial Rehabilitation (Part-I) work consists of special repair of roads, strengthening of crust, raising of formation, additional openings in CD works etc. as per schedule attached and maintenance thereof during defect liability/maintenance period. Contractors are to quote rates keeping in view Rural Road specifications and relevant codes. The work done by the contractor will be measured and paid as per agreement. Quality control of this work will be made as per quality assurance manual of PMGSY work.

Routine Maintenance (Part – II) - work relates to **performance based** regular routine maintenance of roads as per IRC 82 and SP 20 section 1900 which includes, but not limited to, items specified in contract and other relevant clauses of the agreement. Contractor is required to survey the road regularly and attend repair works as and when required and keep the road in good traffic worthy conditions. He will also maintain CDs and Bridges during contract period. These works will be non-measurable and the contractor will be paid at per km/year rates given in the BOQ annexed to NIT plus/minus tender percentage subject to the provisions of contract, for such maintenance.

Payment for routine maintenance will be **performance based**. Performance indexes assigned to various routine maintenance items/activities are given in SBD (Routine maintenance activities and their frequency with performance indexes table). If performance of contractor during the period under consideration fulfils less than 80 out of 100 points, **no payment will be made to the contractor for that period**. If performance index is between 80 to 100, proportionate deduction in payment will be made for each item/activity of the work not attended during that period. Payment will be released once in 2 months @ 1/6 of the annual rate sanctioned, on the certificate of consultant/engineer that roads have been maintained as per agreement.

Renewal of bituminous surface (Part-III) work relates to renewal of bituminous surface of existing PMGSY roads as per schedule of items attached and maintenance thereof during entire contract period. Contractors are to quote rates keeping in view Rural Road specifications and relevant codes. Road stretch to be attended for renewal of bituminous surface and time limit will be intimated by the EE, PIU from time to time as per requirement by issue of work order. The payment for profile corrective course if required shall be allowed but limited to the provisions in the estimate. The work done by the contractor will be measured and paid as per agreement. Quality control of this work will be made as per quality assurance manual of PMGSY work.

Emergency works (Part-IV) - work relate to unexpected damages as a result of natural phenomena or any other cause as per Standard operating procedure of Post 5 years maintenance. for which schedule of work and time limit will be provided by the EE, PIU as and when required after getting approval of competent authority. This will include maintenance also during defect liability/contract period. Contractors are to quote rates keeping in mind Rural Road specifications and relevant codes. The work done by the contractor will be measured and paid as per agreement. Quality control of this work will be made as per quality assurance manual of PMGSY work.

Amount included in the tender for emergency work (Part- IV) is a provisional sum and contractor will have to carry this work as directed by the Engineer-in-charge.
